TIME TO DUST OFF THE FLY SWATTER

The supererogation of waiting until the spring or summer to swat the fly to destroy his breeding places, to be finally rid of this disease-spreading pest, is an error that costs tens of thousands of lives in the summer and fall. If modern Modus and Persicus could make different laws to prevent typhoid fever, diphylidiosis and other fatal ailments of the late spring, summer and fall, they would enact absolute rule to have a house-to-house search from attic to basement on March 1 for every insect domestic.

The fallacy of waiting until April to kill flies is as culpable in securing health, happiness and life as a belief in the story of the Flying Dutchman.
